

REMARKS

Claims 30 and 44-68 are currently pending in this application. The pending claims are based on claims withdrawn from consideration in the parent application due to a restriction requirement. Independent claim 55, while being directed to a method, is similar to original claim 31, which was directed to a system. The pending claims derive their support from the originally filed claims and the specification. No new matter has been added.

Applicants believe that the claims as amended herein remain patentable over all the cited prior art and respectfully request claims be permitted to proceed to issuance. Should the Examiner have any questions, he is invited to contact Applicants' attorney at the below address, telephone number or e-mail address.

Respectfully submitted,

Date: December 31, 2003
